Entrepreneurial

Simulator

2023

Since 2013 we have helped aspirants and students to become high-impact entrepreneurs through our Entrepreneurial Simulator.

Just as pilots need to practice in a simulator before flying a plane, entrepreneurs need to have a safe environment to practice before starting a venture, and that's the reason TrepCamp created the Entrepreneurial Simulator.

If you are reading this document, **we know you have the dream of changing the world in a positive way** through Entrepreneurship, and for that we want to congratulate you, not everyone is willing to take the risk, having said that, we also know that you have a lot of questions and doubts on how to start.

We have created our own practical method to guide and mentor these talented individuals to reach their highest potential. **Our entrepreneurial simulator gives you all the guidance you need in order to go from idea to start-up and everything you need along the way.**

The types of entrepreneurs

Along our journey, we have discovered that participants enter the Entrepreneurial Simulator with 2 different profiles: **The aspirant entrepreneur**, who has the passion, the drive and the intention to start a new venture with teammates but who perhaps still don't know what problem they want to tackle or the idea they want to develop. On the other side we have **the founders with a pitch**, who have already started working on their solution but needs guidance in order to validate it.

Our program's agenda is created in order to give as much value to each of these profiles and to help them get ready to the end goal: **Get accepted in an accelerator or start their funding round.**

Since **our entrepreneurial simulator is composed of 2 stages, one online and one onsite**, during the online part we focus on developing or strengthening each of the participants necessities and because of that, our program has to tracks you can follow: **Pre-seed for the aspirant entrepreneur and the Seed track for the founder with a pitch.** Both tracks merge when the participants get to the onsite stage of the program.

The Pre-seed online stage

The aspirant entrepreneurs need to focus on making sure they have a strong value proposition and a pitch-ready presentation before getting to the onsite stage of the program.

During the online stage they work on creating a minimum viable team, identifying a problem and creating a solution that could transform into the next unicorn start-up.

ONLINE STAGE: WEEK 1 PRE-SEED

Onlines Central Standard Time Onsite: Local time	Monday	Tuesday	Wednesday	Thursday	Friday

The Seed online stage

The founders with a pitch need to focus on making sure their solutions are validated and ready to be presented to a panel of investors.

They **have access to all the workshops and masterclasses of the pre-seed track** but they're not obligated to take them if they feel they already mastered the basics.

During the online stage they have access to individual mentoring in order to elevate their pitch to the next level and also participate in peer-reviewed sessions where they will give and receive feedback from some of the most talented entrepreneurs of their generation.

ONLINE STAGE: WEEK 1 SEED

The onsite stage

During the onsite stage both the aspirant entrepreneurs and the founders with a pitch, travel to one of the most innovative ecosystems in the world to get their ideas and solutions ready to apply for an accelerator or start their funding rounds.

In 3 weeks, **the participants will have the opportunity to network, receive masterclasses, workshops** but specially **to be fully immersed in some of the best cities for entrepreneurship in the world.**

What will you accomplish at the end of the Simulator?

In the past 10 years we have trained **over 5,000 entrepreneurs** and after the program we have heard so many different stories for each of their own entrepreneurial journeys. Today we would like to tell you about the most successful one.

In 2017, Max Casal from Uruguay and Alfonso de los Rios from Mexico traveled and met each other in our Silicon Valley program. **They worked really hard and here you can see the outcome of their efforts:**
